### Aims and objectives:

The International Conference on Electrical Engineering and its Applications (ICEEA) is organized by the Electrical Engineering Laboratory (LGEG), with the collaboration of the faculty of Science and Technology and the University 8 May 1945, Guelma, Algeria. The ICEEA conference aims to become an annual event in the field of the electrical engineering and related applications. It is intended to gather scholars from all over the world to present advances in the relevant fields and to offer an environment conducive to exchanging ideas and information.

The conference objectives:

- ❖ to provide a platform for national and international researchers to debate the most important issues, and discuss, share, and exchange their latest research findings in the area electrical engineering.
- ❖ to develop and promote a network of like-minded people who are passionate about electrical engineering.
- ❖ to enable decision makers by providing them with most current research findings in order to undertake policy needs in the areas of electrical engineering.

### Conference topics:

- Automation
- Sensors and actuators
- Electrical machines and drives
- High voltage and applications
- Mechatronics
- Power Electronics
- Renewable energy and energy storage
- Electromagnetics
- Electric materials
- Power system and smart grids
- Applied artificial intelligence (AI) and machine learning
